after question engagement screen

| some.url/with_query_args	
repair	share
instant search sumo top 5 sumo articles = article 1 = article 2 = article 3 = article 4 = article 5	tweet something give us email click to like firefox

- all links are instrumented / instrumentable by query args, to check engagement

- page can live on a moz site, or as plain content

- a/b test request: which side is first, repair or engage?

- no need for mobile styling

- articles are named by 'user facing' names like "fix search", or "repair home page" or such.

- engagement stuff is a suggestion. Total max people here is ~15k
